Technical Skills

Languages: HTML, CSS, Javascript, TypeScript

Technologies: React JS, Next JS, Tailwind CSS, Git, Node.js, MongoDB, Express js, Docker

Experience

Software Developer

Remote

Brihat Infotech - Internship

Jan 2024– july 2024

- **Edzer LMS Platform:** Developed a Learning Management System with in-built live streaming that allows instructors to teach in real-time. It supported features like interactive features to keep students engaged and optimization for high concurrent usage. It was an all-in-one solution for online education regarding its content management and user tracking.
- **Tax and GST Filing Website:** Worked on the frontend and backend for the filing of taxes and GST, making sure that the user experience goes as seamlessly as possible while complying with all the relevant regulations.
- **UASaloon Website:** Saudi Arabian salon website dealing with booking management, service offerings, and designing the user interface according to regional needs.
- **Hospital Management System:** A full-fledged website for managing hospital operations, including pharmacy stock, doctor and patient appointments, and staff details.
- **Palmistry Platform:** A platform for fortune-telling, horoscope, palm reading, and vastu services where customers book against the experts. Experts can view the details and provide customised reports regarding their readings. This makes the booking process easy and less time-consuming.

Projects

Helix-Hub | *Next Js, Node js, Express, MongoDB, Redux, Typescript*

Under Development

- Dashboard for school owners that includes all expenses, salaries, dues, etc. in one for easy management.
- Student portal consisting of fee notifications, timetable , chatting between staff and students.
- The tasks of school management from finance to communication with students were brought under one umbrella in a user friendly manner.

Shop-Vista | *React Js, Node js, Express, MongoDB, Redux*

[Repo](#) — [Link](#)

- Developed a fully functional e-commerce application, ensuring seamless and responsive user experience.
- Integrated Stripe, thereby providing safe and secure checkout to users.
- Developed an email notification system for managing users about orders and activities.

Kairoshi| *Next Js, Tailwind css, Firebase, Rapid Api*

[Repo](#) — [Link](#)

- Design a robust Instagram post and reel downloader for users to download and manage their downloads easily.
- Added a log-in feature whereby users can log in to securely store and delete their downloaded posts and reels.
- Integrated user authentication to provide users with individual access to download history and management options.

Pop Movie | *React Js, Redux , Sass*

[Repo](#) — [Link](#)

- I built a dynamic movie information website using React and incorporated an API that supplies the newest movies and TV shows
- Provided minute details on the cast and detailed overviews of movies to enhance the user experience
- Designed to be a compelling and informative platform for film lovers to explore and find content.
